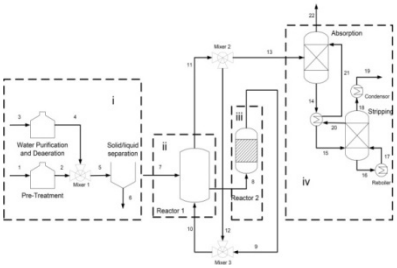
LU BIOFUELS

## Introduction to

# LCA and Process design

## 20-22 August 2012



## Why this course?

Life Cycle Assessment (LCA) and Process Flow Sheet Analysis are vital tools in assessing new biorefinery processes. LU Biofuels has now put together an intensive introductory course in LCA and process design. The course compiles both theory and computer exercises, giving you also some hands-on experience. With this course you will get a basic understanding of the possibilities and limitations of these tools.

## Intended audience

The course is intended for graduate students working on various basic or applied aspects of biofuels – e.g. environmental, economical, biotechnical or engineering aspects. Industrial participants are welcome.

## Course credits

The course will give in total 3 HP. It will be possible to attend just the LCA or the process design.

## Time and place

The course will be arranged at Chemical Center at Lund University between the 20th to 22 of August 2012

## Course fee

Students from LU are free of charge. For others there is a course fee of 1000 SKR.
