SCALARE in a Nutshell

1. “Our organization has become a software company. The problem is that our engineers haven’t realised that yet!”

2. **Urgent need** for a solution to enable organisations to scale software initiatives to reflect the growing importance of software and influence on the overall organisation.

3. **Goals of the SCALARE**: to establish a consortium of key partners to study and characterise the software scaling phenomenon, identify barriers and solutions, and deploy these solutions in European Industry.
SCALARE Topics

Multi-dimensional scaling of software

- Scaling Business and Markets
- Scaling Products and Architecture
- Scaling Processes and Methods
- Scaling Organisations and Resources

Examples of Key Topics:

- Open Source and Inner Source (scaling methods/markets)
- Agile and Lean (scaling methods)
- Global Software Development (scaling organisations)
- Software Architecture and Product Lines (scaling products)
SCALARE Proposal Status

• ITEA2 SCALARE Project Proposal
  – ✓ Proposal Outline (PO) Submitted March 2012
  – ✓ PO accepted for review in April 2012
  – ✓ Invited for Full Project Proposal (FPP) (due Sept. 28)
  – ☐ Notification of acceptance: December 5, 2012.

• Duration: 3 years
  – tentative start in April 2013

• Current Effort: 130 Person Year
