

NewsLetter November 2007

RE-FLEX *flexible reality centre*

The “New” RE-FLEX

RE-FLEX, the Flexible Reality Centre, is a multi-disciplinary center that spans the Faculty of Engineering (LTH), Lund University (LU), Lund University Hospital and Malmö University Hospital. Started in 2005, RE-FLEX has gone through some changes in the last year...

Firstly, this year the main focus is to assist member departments and research labs in bringing research and development at Lund University together. One new area for RE-FLEX is within education and training. Together with CED will RE-FLEX bring visualization and simulation into teaching at LU. We are also trying several new concepts for donations and sponsorship. If you have any ideas, please let us know!

Secondly, RE-FLEX's founder and first coordinator, Roy Davies, left LU to return to New Zealand. Konrad Tollmar is the new coordinator. He is an associate professor at the Department of Design Sciences with a past at MIT, the Interactive Institute and KTH.

The Executive Committee members for 2007 are: Gunnar Bolmsjö (LTH, Mechanical Engineering), Eva Wigforss (LU, Faculty of Medicine) and Nils-Gunnar Holmer (LU, Faculty of Medicine and Region Skåne).

Recent Activities

21 November 2007. Fourth Öresund Symposium on Clinical Skills Training, Malmö, 9.00-17.00.

Upcoming Activities

6-7 December 2007. An open house and workshop

at the Humanities Lab and Virtual Reality Lab, which have carried out major equipment updates through a donation from the Wallenberg

Foundation. Open to all, and in particular to RE-FLEX members and friends-of-the-lab. Please check the website for programme information.

New Website

More info can be found on the new RE-FLEX website: www.lth.se/reflex

That's all for now – see you soonish again.
