

## RE-FLEX Newsletter November 2008

Things are currently changing quickly in the field of simulation and visualization. Likewise, new winds are blowing within RE-FLEX.

### New RE-FLEX coordinator

Konrad Tollmar has left his post as RE-FLEX coordinator. The RE-FLEX board thanks Konrad for this time and wishes him good luck with his new employment

Mattias Wallergård

in Stockholm. The new coordinator is Mattias Wallergård, researcher and teacher in Virtual Reality and human computer interaction at the Department of design sciences.

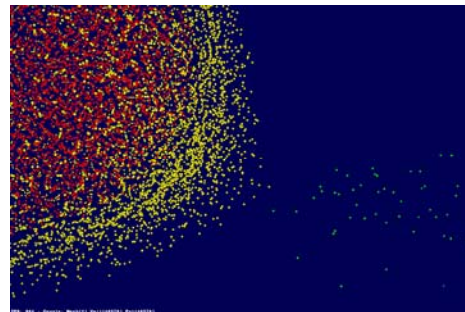

### ViS: A meeting place for visualization

Lund university has applied to become a national meeting place for visualization called *Visualisering i Syd* (ViS). The already existing infrastructure and contact network of RE-FLEX will serve as a fundament for the meeting place. This could mean a breakthrough for visualization and simulation in southern Sweden!

### RE-FLEX and learning

Simulation based learning is becoming a very hot topic all over the world. RE-FLEX demonstrated some of its activities within this field at the 5th Pedagogical Inspiration Conference of LTH. Among

other things, Rikard Lundstedt, John Wentworth and Daniel Malmberg demonstrated *AstroVis*, a result from a collaboration between RE-FLEX and the Department of astronomy.

*AstroVis* is a visualization of a red and a white dwarf star interacting with each other

Hear you soon again!

Mattias Wallergård, RE-FLEX coordinator
